***Pure Power Global Limited Completes Share Conversion Process to Vertichem***

*Company to maintain role as holding vehicle for various corporate investments*

**HONG KONG** – Pure Power Global Limited (“Pure Power”), a Hong Kong Company, announced today that it has completed a formal share exchange with Vertichem Corporation (“Vertichem,” or “the Company”), a green specialty chemical company created to develop and commercialize the products and processes protected by Pure Power’s intellectual property. Vertichem is domiciled as a BVI company and has its corporate headquarters in Toronto, Canada.

Pure Power’s U.S.-based patents, covering the gentle conversion of raw, woody biomass to specialty chemicals, have been transferred to Vertichem as an integral part of the share exchange. New Vertichem shares were issued in exchange for investors’ extant Pure Power shares. All former Pure Power investors now own identical shareholding interests in Vertichem.

“Vertichem is a natural evolution of the company our investors signed on with in Pure Power,” said David Milroy, Pure Power Director, and Chairman and Chief Executive of Vertichem. “It features the same leadership, the same goals for success and, crucially, the same technology and patents. This share-exchange makes it official.”

With the completion of the Pure Power-Vertichem share exchange, the Company has also established a new, stand-alone BVI company – Pure Power Global Limited – that will continue to act as an investment vehicle and corporate holding company. In effect, Pure Power (Hong Kong) will spin off its cornerstone investment in Aquaflo Bionomic Corporation (along with the rights of first refusal to license Aquaflo’s technologies throughout Asia) to the new Pure Power Global Limited (BVI). All existing Vertichem shareholders will receive similar shareholding interests in the stand-alone Pure Power Global Limited (BVI). Pure Power (Hong Kong) will be dissolved in due course.

David Milroy, formerly Chairman and Chief Executive of Pure Power, and now currently of Vertichem Corporation, will retain a position of Director at the new Pure Power Global Limited (BVI). He is joined at the new Pure Power Global Limited (BVI) by Director Roger Williams, who is currently Vertichem’s Senior Vice President for Corporate Development and General Counsel.
